

Administration, Research and Public Service

OFFICE OF THE PRESIDENT

The Office of the President is the lead component for executive management of the institution. It comprises the Office of the Liaison to the Board of Trustees and the president's administrative and managerial staff. The president's cabinet comprises the provost and vice president for academic affairs, the vice president for administration and finance, the vice president for institutional advancement, the vice president for information technology services and assessment, the vice provost for research and public service, the vice provost for access and enrollment services, the vice president for business development and innovation, and the director of presidential operations. The president meets with his direct reports bi-monthly to discuss and decide policies and develop strategies for the achievement of institutional priorities.

OFFICE OF THE PROVOST

The provost is the chief academic officer, the second line officer, the policy staff officer and reports to the president. The provost is responsible for all matters relating to academic colleges and schools, academic programs, academic policy development, implementation and review, academic and student support services, enrollment management, research policy development, and research and public service. The units that report to the provost are the Office of the Vice Provost for Research and Public Service, the Office of Access and Enrollment Services, the academic colleges and schools, global and graduate education, the Honors Program, the Center for Student Success, the dean of students, athletics, V.I. Experimental Program to Stimulate Competitive Research.

Academic Colleges and Schools

The University's degree programs are offered through five academic colleges and schools: the School of Business, School of Education, College of Liberal Arts and Social Sciences, School of Nursing, and College of Science and Mathematics. Each is headed by a dean who reports directly to the provost.

Center for Excellence in Leadership and Learning (CELL)

UVICELL is the division within the University that is responsible for the development, implementation, and delivery of programs and services that focus on community engagement; technical and vocational education; planning, economic engagement, and policy analysis; corporate training, continuing education, and professional and licensure education.

UVICELL is accredited through the International Association for Continuing Education and Training (IACET) and can offer Continuing Education Units (CEUs). The IACET CEU is internationally recognized as a measure of quality in continuing education and training.

The center provides testing and proctoring services for college-bound students, UVI students, and the community at large. These testing services include:

- Proctoring services for individuals that require exams to be proctored from other accredited colleges, businesses, or companies.
- Prometric which provides comprehensive testing and assessment services to include the GRE, Praxis, and GED exams. For a complete listing of exams offered, visit www.prometric.com.

Administration, Research and Public Service

com.

- Test of Essential Academic Skills (TEAS) which is used as part of the admissions process by the School of Nursing and Allied Health schools nationwide.
- College Level Examination Program (CLEP) which demonstrates competency in a particular subject area to bypass a course.
- Placement Testing which is based on the SAT/ACT scores of incoming students and is required before enrolling in any college-level writing and/or math course.

UVI CELL also serves as the official test site for several professional certifications and organizations. For a complete listing of testing services offered by UVI CELL, please visit <https://cell.uvi.edu/information-for/testers.aspx>

Virgin Islands University Center for Excellence In Developmental Disabilities

The Virgin Islands University Center for Excellence in Developmental Disabilities (VIUCEDD) was established in October 1994 and is funded by the U.S. Department of Health and Human Services, Administration for Community Living (ACL), Administration on Intellectual and Developmental Disabilities (AIDD) and National Institute on Disability, Independent Living, and Rehabilitation Research (NIDILRR). Its mission is to enhance the quality of life for individuals with disabilities and their families and to provide them with tools necessary for independence, productivity, and full inclusion into community life.

VIUCEDD's goals are:

- To demonstrate and promote exemplary approaches in clinical, educational and community settings.
- To provide technical assistance.
- To disseminate information related to the implementation of best practices.
- To ensure the participation of persons with disabilities and their families in the design and implementation of all VIUCEDD activities.
- To coordinate, implement and supervise support services for the families with children with disabilities that promote their independence, self-advocacy and integration in the community.
- To provide training on the laws that protects the rights of persons with disabilities and their families and sensitivity towards persons with disabilities.

Global and Graduate Education

Global initiatives are realized through collaboration with the academic colleges and schools, the dean of students, and institutions of higher education regionally, nationally, and internationally. Global initiatives encompass development, coordination, and monitoring of study abroad and special student and faculty exchange programs through affiliations, memoranda of understanding, and memoranda of agreements.

The graduate programs at the University of the Virgin Islands were developed to meet specific needs in the territory and beyond. While each of the programs has its own mission, the overall aim of all the areas of graduate study is to provide a high-quality education for students to meet their professional and technical training needs. Information on degree programs is available in the Graduate Bulletin and at www.uvi.edu.

Committee on Learning Assessment for Student Success (CLASS)

CLASS's charge is to facilitate, monitor and support the development and implementation of student learning outcomes assessment plans for UVI academic colleges and schools and for general education. CLASS's long-term goal is to spearhead UVI's transformation into a 'culture of evidence' and a learner-centered institution committed to student success.

Administration, Research and Public Service

Honors Program

The UVI Honors Program seeks to produce exceptional scholars and citizens by providing participants with enriched intellectual, leadership and outreach experiences designed to cultivate thoughtful, deliberative, articulate, ethically grounded, globally connected and actively contributing members of society. For details on the program, see p. 68 of this catalog.

RESEARCH AND PUBLIC SERVICE

The University of the Virgin Islands addresses two of the major elements of its Mission, Research and Public Service through the strategic efforts of the units within Research and Public Service. The Agricultural Experiment Station (AES), the Center for Marine and Environmental Studies (CMES), the Cooperative Extension Service (CES), the Eastern Caribbean Center (ECC), the Research Publications Unit (*The Caribbean Writer*), the Virgin Islands Small Business Development Center (VI SBDC), Virgin Islands Experimental Program to Stimulate Competitive Research (VI-EPSCoR), and the Water Resources Research Institute (WRRRI) are principally responsible for defining and solving problems through research and providing quality services that address needs identified by the community.

Agricultural Experiment Station (AES)

The Agricultural Experiment Station is one of the two units that carry out the Land-Grant function of the University. The mission of AES is to conduct basic and applied research to meet the needs of the local agricultural community to increase production and improve efficiency of tropical plants and livestock, develop new enterprises, preserve and propagate endangered plant species and protect the natural resource base. This is accomplished by generating science-based information that leads to improved agricultural practices in the Virgin Islands and the Caribbean Region. Research programs in AES are influenced by available funding, the farming community and research conducted at other agricultural research institutions. The scientists in AES are actively involved in research projects in agronomy, animal science, aquaculture, biotechnology, agroforestry, and horticulture. Science-based information is disseminated through presentations at regional, national, and international conferences, seminars and workshops as well as publication in peer-reviewed, scientific journals, research bulletins, fact sheets and farmers' bulletins.

Center for Marine and Environmental Studies (CMES)

The Center for Marine and Environmental Studies addresses environmental problems unique to tropical island communities and advances knowledge and learning in coastal marine systems through research, education, and outreach programs. Based in the McLean Marine Science Center on St. Thomas, CMES collaborates with local organizations, other universities and governmental agencies to assess and monitor marine ecosystems and identify methods of conserving fisheries and marine and coastal areas that provide support for sustainable natural resource management. The Virgin Islands Marine Advisory Service (VIMAS), a part of the national Sea Grant Program, collaborates with public and private-sector institutions to disseminate information on St. Thomas, St. Croix and St. John. The Virgin Islands Environmental Resource Station (VIERS), located on St. John and managed by Clean Islands International, provides unique learning opportunities through environmental education and research programs and activities. CMES provides opportunities for UVI students to participate in active research projects and gain experience in a variety of field and laboratory techniques. The CMES facilities on St. Thomas and St. John provide easy access to a variety of tropical marine environments and include a fleet of research vessels, sea tables and aquaria, research instrumentation as well as training and support for air and nitrox scuba diving.

Administration, Research and Public Service

Cooperative Extension Service (CES)

The Cooperative Extension Service is the second unit that carries out Land-Grant functions at the University of the Virgin Islands.

Through the federal network of the Land-Grant University System, the Cooperative Extension Service is empowered as an agency for public education and information dissemination responding to the needs of the community. Its mission is to be a dynamic, flexible organization dedicated to delivering research-based educational programs and information that address critical issues affecting families, individuals, and the communities of the U.S. Virgin Islands. CES carries out programs in agriculture and natural resources, 4-H/family and consumer sciences, and communications, technology & distance education in the districts of St. Croix, St. Thomas-St. John.

The agriculture and natural resource programs strive to meet the changing needs of the territory and offer technical assistance, training and advice to farmers, home gardeners, youth groups, government and nongovernment agencies and residents of the territory in the areas of environmental horticulture, livestock, natural resources and environmental management. Building strong families, youth and communities is important for the success of the Virgin Islands' community.

To address many of the critical issues relating to families, youth and communities, the 4-H/ Family and Consumer Sciences Program, in cooperation with local and private partners, provides research-based information in life-coping skills, and encourages families to use all available resources to improve their lives. The program offers workshops, short courses, and demonstrations in areas such as: consumer education and personal financial management, foods and nutrition education, marketable skills training, i.e., computer training, clothing construction and parenting. Considerable focus is placed on outreach to limited resource residents. Areas of emphasis of the program include the Expanded Foods and Nutrition Education Program (EFNEP), which is designed to assist limited resource families in acquiring the knowledge, skills, and attitudes to improve diets and nutritional well-being; and the Children, Youth and Families at Risk (CYFAR) Program that addresses the needs of the youth in the territory.

The latest publication of CES – *Tropical Fruits of the U. S. Virgin Islands and Their Nutritional Values* – is a testament to CES' continuing tradition of documenting and disseminating research-based information that addresses the critical needs affecting the diet, health and nutrition, not only of U.S. Virgin Islanders, but of residents of the wider Caribbean. Publications, such as the *Native Recipes*, *Virgin Islands Holiday Cooking*, *Heart of the Pumpkin*, and *Traditional and Medicinal Plants of St. Croix, St. Thomas, and St. John*, come from the Communications, Technology & Distance Education Program. Additionally, this program has collaborated with other UVI departments in the publishing of *Island Peak to Coral Reef - A Field Guide to Plant and Marine Communities of the Virgin Islands* and *Remarkable Big Trees in the U.S. Virgin Islands*.

Eastern Caribbean Center (ECC)

The Eastern Caribbean Center is an outreach division that anticipates the social, economic, and environmental needs of the Virgin Islands and the region, and conducts research programs to address those needs. It also facilitates collaboration in research among local, national, and regional institutions and organizations toward fulfilling the mission of the University and improving the quality of life for people within these areas. The ECC social research unit compiles and analyzes social and economic data, and supports and extends the work of the U.S. Bureau of the Census. The survey research unit designs and carries out scientific sample household and telephone surveys. It also utilizes geographical information system (GIS) technology to compile, analyze and disseminate socio-economic and natural resource data to promote sound development decisions. The center is also

Administration, Research and Public Service

dedicated to instruction on the effective and efficient use of GIS in the public and private sectors. ECC also publishes *Caribbean Perspectives*, a cutting-edge annual magazine that speaks to the leadership throughout the Caribbean.

Office of Sponsored Programs (OSP)

The Office of Sponsored Programs (OSP) is the university unit responsible for reviewing and submitting extra-mural proposals to various federal, private and local agencies. OSP is responsible for the receipt and pre-award management of contracts, grants, MOUs, MOAs and cooperative agreements awarded to UVI. OSP also acts as the designated administrative unit for overall research compliance at UVI and for managing activities of the Institutional Review Board (IRB) for human subject protection and Institutional Animal Care and Use Committee (IACUC) for animal use in research. OSP helps to identify and disseminate funding opportunities for staff and research faculties, provides guidance on budget preparation and liaises with external agencies. OSP offers workshops from time to time on grant writing and general award management. Advice and assistance on proposal development and award management are also available to the university research enterprise.

Title III Project Administration Office

Since 1968, the U.S. Education Department (USED), through its Title III, Part B -Strengthening Historically Black Colleges and Universities (HBCUs) program (and the program's predecessor), has partnered with the University of the Virgin Islands to implement several projects that have served to strengthen UVI. Title III, Part B grants are awarded to HBCUs according to a formula and provide financial assistance to these institutions to assist in establishing or strengthening their physical plants, financial management, academic resources, and endowments.

The Student Aid and Fiscal Responsibility Act (SAFRA) grant program was approved in 2010 (under Part F of Title III) as a supplemental funding source to provide additional aid to Minority Serving Institutions in two five-year cycles, ending in September, 2020. This temporary funding was replaced with the passage of the FUTURE Act in 2019, making the Part F funding permanent. Both Part B and Part F grant support are provided in five-year cycles.

Administered by USED's Office of Institutional Services, the Title III, Part B program provides over \$220,000,000 to HBCUs across the United States. The UVI Title III Project Administration office is responsible for managing both the Title III Part B and Part F grants awarded to the institution. Together, these grants provide over \$2 million annually to strengthen programs at the institution.

Research Publications Unit

The Caribbean Writer is the primary publication of the Research Publications Unit at UVI. An international literary journal, *The Caribbean Writer* publishes exceptional works by established and emerging writers from the greater Caribbean region and beyond. The journal premiered in 1987, and includes poetry, prose, personal narrative, book reviews and special sections, often tributes to Caribbean writers and/or intellects. The main goal of the journal is to develop and foster new writers and to continue to serve as an outlet for new writings in the Caribbean. In addition to publishing *The Caribbean Writer*, the Research Publications Unit has also published two anthologies, *Contemporary Drama of the Caribbean*, edited by Erika J. Waters and David Edgecombe, and *Seasoning for the Mortar: Virgin Islanders Writing in The Caribbean Writer Volumes 1-15*, edited by Marvin E. Williams. The editorial board of the refereed journal, consists of UVI College of Liberal Arts and Social Sciences faculty. The Advisory Editorial Board comprises an acclaimed international group of established Caribbean writers. The website, www.TheCaribbeanWriter.org, has become a global resource for Caribbean literature.

Virgin Islands Small Business Development Center (VI SBDC)

The VI Small Business Development Center (VI SBDC) is a partnership program between

Administration, Research and Public Service

the U.S. Small Business Administration and the University of the Virgin Islands. Its mission is to assist emerging and existing small businesses through high quality professional counseling and training, contributing to the economic growth of the U.S. Virgin Islands. Its vision is to be the premier provider of small business services. The VI SBDC provides small business owners and aspiring entrepreneurs practical assistance to grow and prosper in an ever-changing economy. Since its establishment in 1985, the VI SBDC has played a vital role in the development of local businesses and the reduction of failure among existing businesses. Business Counseling Services are free and confidential. The VI SBDC is part of a close network of public and private business organizations committed to fostering the economic stability and growth of small businesses in the territory.

Virgin Islands Established Program to Stimulate Competitive Research (VI-EPSCoR)

The Virgin Islands Established Program to Stimulate Competitive Research (VI-EPSCoR) promotes the development of science and technology resources in the USVI by conducting research in areas relevant to the sustainable development of the Territory. Other areas of focus for VI-EPSCoR include improving research infrastructure within the USVI, increasing participation of students in science and technology in order to build a skilled workforce, and building partnerships between government, non-governmental organizations, and the private sector, all in an effort to create a foundation of research and development for economic growth. VI-EPSCoR currently supports research on locally relevant topics such as the local and global drivers of environmental change and how these changes impact our coral reefs, fisheries and coastal resources like our mangrove forests. VI-EPSCoR funds are also used to strengthen the territory's education in the areas of science, mathematics and technology, and VI-EPSCoR aims to provide students with opportunities to engage in hands-on and feet-wet learning in marine science. VI-EPSCoR is supported by a grant from the National Science Foundation, funding from the government of the Virgin Islands and by generous donations from members of the Virgin Islands community. The program is hosted by the University of the Virgin Islands on behalf of the people of the Virgin Islands.

Water Resources Research Institute (WRII)

The Water Resources Research Institute conducts research throughout the U.S. Virgin Islands in participation with the U.S. Geological Survey. Current WRII research includes investigating ways to reduce non-point source pollution to the critical nearshore marine environment of the islands. This includes identifying methods of erosion control, development of methods for coastal water quality assessments and finding innovative ways to treat domestic wastewater as alternatives to traditional septic tank systems. Other WRII activities include dissemination of information promoting conservation of the islands' water resources and providing environmental research training experiences for students and others.

OFFICE OF INSTITUTIONAL RESEARCH AND PLANNING

The Office of Institutional Research and Planning (IRP) gathers data on the University and provides information useful for making strategic decisions. IRP produces an annual Institutional Data Summary which contains the latest statistics on enrollment, student and faculty characteristics, university income and expenditures, and related topics. For some topics, historical data are provided to establish trends. Brief reports are sometimes issued on topics of general interest, or in response to special requests of other university units.

IRP keeps abreast of events and trends in the Virgin Islands, the Caribbean region and beyond to note factors which might impact the future of the University. The results are made available to persons planning for the future of the University. IRP provides annual reports to the National Center for Education Statistics and the Commission on Higher Education of the Middle States Association of Colleges and Schools, and participates in surveys conducted by other external agencies. Linkage to other universities is maintained through the Internet and by membership in the Association for Institutional Research.
